

PHOTON ENERGY ANNOUNCEMENT**LAURU BADITA JOINS PHOTON
ENERGY AS COUNTRY
MANAGER FOR ROMANIA**

Global solar power solutions provider Photon Energy NV has strengthened its ranks by welcoming Lauru Badita as Country Manager Operations and Maintenance for Romania. Lauru Badita has over 15 years of experience in business development including renewable energy sector and will spearhead the expansion of Photon Energy's O&M portfolio in Romania.

Lauru Badita worked on more than 200 MW of renewable energy projects, including the 20 MWp Targu-Carbunesti PV project. In the past he also set up the "Security electronic inter-banking payments system" managed by Transfond, the National Bank of Romania and 45 other banks.

Lauru has been advising Photon Energy on the Romanian market, where the company currently provides O&M services to 11 MWp, and has now joined the team as Country Manager. He will roll-out Photon Energy's lifecycle solar power solutions, including the state-of-the-art PV monitoring and control system "PECOM".

**LAURU BADITA SE ALATURA
PHOTON ENERGY SI ESTE
NUMIT COUNTRY MANAGER
PENTRU ROMANIA**

Furnizorul global de solutii de energie solara Photon Energy NV si-a intarit randurile cu primirea lui Lauru Badita numit Country Manager Operare si Mentenanta pentru Romania. Lauru Badita are peste 15 ani experienta in dezvoltarea afacerilor inclusiv in sectorul energiei regenerabile si va fi varful de lance in expansiunea portofoliului Photon Energy O&M in Romania.

Lauru Badita a lucrat la mai mult de 200 MW proiecte de energie regenerabila, inclusiv proiectul fotovoltaic de 20 MW Targu-Carbunesti. In trecut a implementat "Securizarea sistemului electronic de plati interbancale" operat de Transfond, Banca Nationala a Romaniei si alte 45 de banci.

Lauru a consiliat Photon Energy pe piata din Romania, unde compania furnizeaza in prezent servicii O&M (Operare si Mentenanta) pentru 11 MW, iar acum s-a alaturat echipei fiind numit Country Manager. El va implementa solutiile de energie solara Photon Energy, inclusiv sistemul PV avansat de monitorizare si control "PECOM".
